2002 PELLY Report Grade Information File Transfer Format

Data can be transferred to the state via the following method:

Tab-Delimited Data File

Notes On Tab-Delimited Files

If you generate the data from information already on a computer, you will probably want to use a tab-delimited file to transfer data.

In a tab-delimited file, tabs separate the data. This means that any tabs that are intended to be part of the data will cause serious problems.

PLEASE MAKE SURE THAT ANY TABS THAT ARE PART OF THE DATA ARE NOT INCLUDED.

Data that is not applicable can be skipped, but the tab must be there. 0's can also be used to indicate no students.
